DATA LOGGER PWBLOGG N6/60

Network measurement in the field of gas and water

- Logging pressure readings
- Measurement range from 50 mbar to 70 bar
- Upgrading by one external impulse or temperature input
- PWBlogg N6/60 specially developed for application in street caps
- High-value electronics integrated in robust stainless steel housing
- Immune to extraneous cause of dirt and moisture by housing protection class IP 68
- Compact design protects reliably against mechanical stress
- Accredited for operation within Ex zone 2

- Flexible pressure port facilitates connecting the data logger in the street cap
- Waterproofed venting element can optionally be connected to the logger via tube
- Device can be equipped with absolute pressure transducer
- Built-in lithium batteries and low power consumption facilitate long-term measurement
- Analogue signal resolution up to 16 bit possible

- Threshold value specification for pressure facilitates automatic measurement start and logging after fixing at measurement location
- User-friendly software PWB-Soft 3.0 for setting parameters, reading and evaluating performance data
- USB online cable for connection PC/laptop/netbook
